Bangalore, India | bhisheshrikrushn0101@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Alliance University

Bachelor of Technology – Information Technology

Bangalore, India

Aug. 2024 – May 2028 (Expected)

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Core: Data Structures & Algorithms, OOP, DBMS

Data & ML: NumPy, Pandas, Machine Learning (Fundamentals), OpenCV

Tools: Git, GitHub, Postman, VS Code, Vercel

PROJECTS

Saksham AI | Node.js, AI/ML, REST APIs, MongoDB

Jan 2025 – Present

- Architected an AI-powered medical report analyzer that automates extraction of critical health parameters from unstructured diagnostic files, reducing manual interpretation effort by ~50%.
- Engineered a Node.js backend with RESTful APIs supporting end-to-end document ingestion, intelligent parsing, and structured data output — processing reports ~3× faster than manual review.
- Leading full product lifecycle as a startup initiative — architecture, roadmap, and scalability for a real-world healthcare AI platform.

MediRoute AI | AI, Node.js, Healthcare AI, REST APIs

Jan 2026 – Present

- Developed an AI-based healthcare routing system that streamlines clinical decision workflows, reducing API response latency by an estimated **40%** through optimized data flow and intelligent routing logic.
- Integrated domain-specific AI ranking logic to surface prioritized health recommendations, improving decision support accuracy by approximately **30%**.

YOLO Object Detection | Python, YOLO, OpenCV, Computer Vision

2024

- Implemented real-time multi-class object detection using YOLOv5 and OpenCV, achieving ~25 FPS inference on live video streams with production-ready bounding box rendering.
- Optimized confidence thresholds and preprocessing pipeline, improving detection accuracy by an estimated 15–20% across diverse object categories.

Poetry Platform | React.js, Node.js, MongoDB – In Progress

2026

- Building a full-stack content platform with user authentication, dynamic feeds, and a responsive React.js frontend designed to handle concurrent users.
- Designing a scalable Node.js REST API with MongoDB for content management, engagement tracking, and modular data handling.

ACHIEVEMENTS & LEADERSHIP

Smart India Hackathon (SIH) | Team Lead & National Semifinalist

2025

- Led a **6-member** cross-functional team to the Semifinals among **300+** competing teams nationwide; engineered and delivered a working prototype within a **48-hour** competitive window.

Project Lead | Saksham AI & MediRoute AI

2025 – Present

- Independently building two AI-driven healthcare platforms — owning system architecture, engineering execution, and product roadmap across **2 live projects** simultaneously.

CERTIFICATIONS

AZ-305: Azure Solutions Architect Cert Prep | LinkedIn Learning

2024

- Covered: cloud infrastructure design, identity & governance, data storage solutions, and Azure cost optimization.

Data Structures and Algorithms | NPTEL – SWAYAM

2025

- Covered: arrays, linked lists, trees, graphs, dynamic programming, sorting algorithms, and algorithmic complexity analysis.
